

User: tell me what actions I should do to save my life in case of Earthquake. Give bullet points, stay concise and start your response already with 1... 2... without any sum-up talks. Go!

ChatGPT: 1. Drop down to the ground and take cover under sturdy furniture or against an interior wall. 2. Hold on to something sturdy, like the furniture you are under, and if possible, cover your head and neck with your arms. 3. Stay inside until the shaking stops and it is safe to exit the building. 4. If you are outside, move away from buildings, streetlights, and utility wires and poles. 5. In a vehicle, pull over to a safe location and stay inside with a seatbelt on until the shaking stops. 6. Once the shaking stops, check for injuries and damage, and prepare for aftershocks. 7. Be prepared with emergency supplies, such as food, water, first aid, and a flashlight.
